

# Modernization Kit ASSA ABLOY M Inspection window for industrial doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

## A secure solution to look outside

### Key Benefit

Security

Convenience

### Applications

Doors are often without windows, because windows may compromise privacy or undesired daylight transmittance. Full sandwich panel doors also have the highest insulation value.

If there is a need to be able to look outside, for example to see if the truck has already docked the loading dock or to see what is going on outside, an inspection window is the ideal solution, without compromising privacy or daylight transmittance.

### How it works

The inspection window is only required to look through, therefore the window has a very limited size, only 414 mm by 134 mm.

To ensure privacy, the window has a shutter on the inside that covers the window, secured with a magnet. Looking through the window is only possible if the shutter is lifted.

## Overview

## Available kits for ASSA ABLOY M Inspection window

Name	Type	Remarks
Window inspection	Fits all sandwich panels 40-50 mm	Window opening: 414x134

## Benefits

### Key benefits are:

- Look outside, but not inside
- Minimizes insulation loss
